History AutoCAD has been available for more than 20 years, and is widely used in the 2D drafting industry. The first version, AutoCAD 1, was introduced in 1982, and made its official debut at AutoCAD's first user group meeting in New York City. AutoCAD and AutoCAD LT have come a long way since their first appearance. AutoCAD LT was a low-end version of AutoCAD and was only sold to AutoCAD LT users. In 1988, the first version of AutoCAD was released for the personal computer (PC). This first version was a DOS-based PC version and included basic tools such as lines, arcs, circles, etc. In 1991, AutoCAD 95 was released as a Windows based application and came with dozens of more features such as B-rep, point clouds, and advanced renderings. In the mid-1990s, 3D was added to AutoCAD and later, applications that ran on both the PC and Mac were available. Since its introduction in 1982, AutoCAD has been available in many different editions. The following table shows the different versions of AutoCAD that have been released since its original release in 1982. Autodesk releases a new version of AutoCAD with a new version numbering system every 6-9 months. All AutoCAD product releases and new features are listed on the AutoCAD product web page. A two-week, coast-to-coast, radio-promoting, Mellencamp tour was announced in mid-October, featuring more than 20 stops—including a free show in Denver for Colorado Water Plan's Annual Water Day, on November 7. See "Mellencamp on Tour," September 19, 2012, Page 34. Not one to stay off the road for long, however, Mellencamp has been performing music nonstop—and looking to relax. "I had a really good time last year. I took a lot of baths," he said in a recent interview. The best part about bath time, according to Mellencamp, is the "float." "It's like you're under a lazy river and you get some weight off," he said. "I took a bath this morning, which was really nice." As a Colorado native, Mellencamp said he really enjoys the state's outdoors. "I love Colorado and the Rocky Mountains. I've got some really good times in those areas," he said. Not a fan of skiing, however, Mellencamp has no problems at getting around the state. "I did a little traveling last year. a1d647c40b
